

Backup Sump Systems

The ECP Professional Line of Backup Sump Pump Systems combines peace of mind and energy efficiency in a single package. The BSPC line is the most energy efficient, reliable and highest performing battery backup systems on the market today. When combined with the ECP Sump Basin there is no better protection against basement flooding. With three sizes to choose from we have a system to fit your individual needs no matter the extent of your basement water problem. Along with our market leading energy efficiency, our professional line of Backup Pump Systems offers the most advanced pump control switches, monitoring and diagnostic capabilities.

Our redundant mechanisms assure that your sump pump will keep your basement dry and safe no matter the situation. The ECP monitoring systems will sound an alarm when a problem arises and remind you when any attention is needed. When you consider pumping capacity, energy efficiency, charger strength and monitoring features you will find that the only name in sump pumps to consider is the ECP BSPC System.

Benefits of ECP BSPC System Backup

- Continuous duty rated
- Dual pump switch and controller
- Automatically switches to battery backup when AC power fails
- Complete monitoring system
- Auto phone dialer enabled (optional)
- Energy efficient PSC motor
- Recharges automatically
- Best gallons/watt hr
- Up to 3,000 GPH
- Ball bearing for long life
- Dual ceramic shaft seals
- Long life batteries
